ANNUAL REPORT

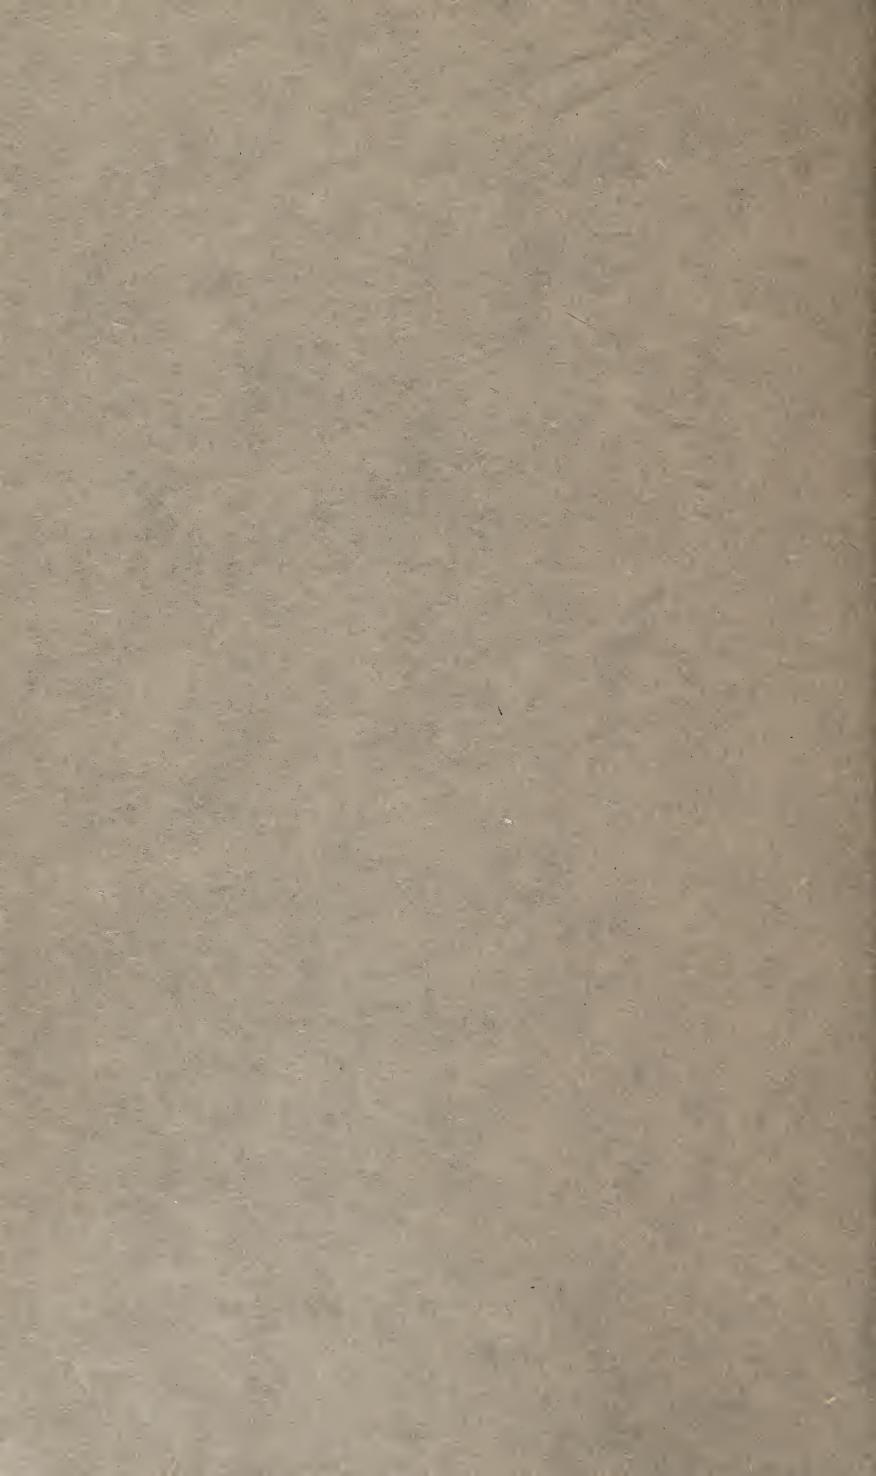

OF THE

MEDICAL OFFICER OF HEALTH FOR 1944

LUFF & SONS LTD.
PRINTERS,
ST. LEONARD'S ROAD, WINDSOR.

To the CHAIRMAN and MEMBERS of the JOINT COMMITTEE for the UNITED SANITARY DISTRICTS OF EAST BERKS.

GENTLEMEN,

On the 30th June, 1944, your Medical Officer of Health, Dr. Paterson, retired on reaching the age of 65 years and after serving you for thirty-three years. I was privileged to be his successor, and commenced my duties on the 1st August.

To those who knew Dr. Paterson it was not surprising news that, instead of proceeding to enjoy a well-earned rest, he immediately "joined up," and went to the Middle East as one of the principal medical personnel of U.N.R.R.A. It was, however, surprising and bitterly sad news that came in October. Dr. Paterson—"Dr. Pat," "the Doc," the friend of so many both inside and outside of Berkshire—was dead. He died suddenly at Bari, in Italy, on the 24th October, 1944, less than four months after his retiral from East Berks.

Since my appointment I have spent much time reading over his reports and correspondence. They date back to 1911. They are the work of a forceful, original and dominant personality; and, at the same time, his correspondence throughout the thirty-three years shows him to have been essentially tolerant and kindly.

I hope that I may follow worthily in his footsteps and serve you as well.

I am, Gentlemen,

Your obedient Servant,

W B moore

Medical Officer of Health.

"The Wilderness,"
Cookham Road, Maidenhead.
(Tel. No. 549).

August, 1945.

Members of the Joint Committee

East Berks United Sanitary Districts for the Year 1945.

Representing MAIDENHEAD Urban District:

- L. R. F. Oldershaw, Esq., 15, St. Luke's Road, Maidenhead.
- W. Archer, Esq., "Dovercot," The Crescent, Maidenhead.
- E. B. Norris, Esq., "Grafton Lodge," Belmont Park Road, Maidenhead.

Representing COOKHAM Rural District:

Capt. H. Pinder-Brown, Hedsordene, Cookham.

J. C. Besley, Esq., "Lewins," Shurlock Row, nr. Twyford.

Representing EASTHAMPSTEAD Rural District:

- J. May, Esq., Greenacres, Old Bracknell.
- E. A. Slyfield, Esq., "Elmhurst," Wokingham Road, Bracknell.
- J. Bowyer, Esq., Mount Pleasant, Bracknell.

Representing WINDSOR Rural District:

Mrs. M. Legge, Farm House, Old Windsor.

W. H. Oates, Esq., Kinross House, Sunningdale.

Representing WOKINGHAM Urban District:

C. Goddard, Esq., Coppid House, Rectory Road, Wokingham.

Representing WOKINGHAM Rural District:

Miss G. M. Godsal, Forest Oak, Wokingham.

F. W. Davis, Esq., Orchard Cottage, King Street Lane, Winnersh. Lt.-Col. E. H. Sweet, C.M.G., D.S.O., Oaklands Farm, Crowthorne.

Clerk to the Joint Committee:

J. A. Baird, Esq., Guildhall, Maidenhead. (Tel. 2440.)

East Berks United Sanitary Districts

CONSTITUTION OF THE DISTRICTS.

This has been described in previous Reports and need not be repeated. (See Report for 1941, page 4.)

INFECTIOUS DISEASE.

IMMUNISATION.

A Clinic is held at "The Wilderness" on the first Saturday of the month for immunising children against Diphtheria. During 1944, 317 children received the full course of treatment and the total number of children immunised since 1940, including those done at the schools, is 4,082.

The usual statistics relating to notifiable infectious diseases are set out in the tables below:—

TUBERCULOSIS

It was not necessary to take any specific action under the Public Health (Prevention of Tuberculosis) Regulations, 1925 (compulsory discontinuance of employment) or under Section 62 of the Public Health Act, 1925 (compulsory removal of patient to institution). These requirements are now included in Section 172 of the Public Health Act, 1936.

Particulars of new cases of Tuberculosis and of all deaths from this disease, whether the cases have been notified or not, during the current year are set out in the table below :—

WATER SUPPLY.

The water supply to the Borough continues to be satisfactory in quality and quantity. Sixty-four bacteriological examinations made of the raw water, all of which were returned as satisfactory. Two chemical analyses were made, which showed the water to be pure but hard (total hardness 32, temporary hardness 24.5, permanent hardness 7.5). Practically all the houses in the Borough are connected to the mains. Twelve connections were made to domestic premises during the year.

DRAINAGE AND SEWERAGE.

About 90% of the houses in the Borough are connected to the sewers leaving 10% draining to cesspools. The whole of the works on the Council's main drainage scheme have now been completed, and extensions to the Sewage Disposal Works are in full operation. The flow to the Sewage Works continues to increase, and the Borough Surveyor is of the opinion that further extensions to the Disposal Works may be necessary in the near future.

Difficulty has been experienced in disposing of the whole of the sewage sludge, and the Council is considering the advisability of installing a Sludge Digestion Plant.

PUBLIC CLEANSING.

The Borough Surveyor reports as follows:—

"House refuse collection is causing the Council considerable anxiety. The labour position is more acute than ever, and there have been times when the collection of house refuse has been delayed for several weeks. In consequence, a large proportion of the dustbins have become infested with fly maggots, and a considerable increase in the number of house flies is noticeable. House refuse continues to be disposed of by composting with sewage sludge for the production of an agricultural compost."

SANITARY INSPECTION OF THE BOROUGH.

Following is the report of the Sanitary Inspector for the year.

FOOD DECONTAMINATION.

Exercises have been continued and visits paid outside the district to witness demonstrations, all of which are useful in keeping the personnel interested and up-to-date with the methods to be employed should the

occasion arise. In addition, Mr. Bishop, the Deputy Food Decontamination Officer, attended an Anti-Gas Course arranged by the Ministry of Home Security held at Falfield from the 1st to the 6th May.

RODENT CONTROL.

Two trained Rodent Operators have been employed during the year on the extermination of rats and mice.

In addition to investigating complaints of infestation received from day to day, treatment of the Borough on the block control system was commenced.

Much of the expense of Rodent Control work is irrecoverable for various reasons. The original Survey is now out-of-date by the time that treatment of a block is due to commence and, in order to deal effectively with these areas, each block must be re-surveyed immediately prior to treatment.

Much time and effort is expended on investigating complaints and reports of infestations which prove to be incorrect or in which, after laying test baits, it is found that the complaint is not justified.

Although excellent results have been achieved, greater success could be attained and heartier co-operation received from the public if the cost of the work involved could be made a charge on the rates, as is common with other essential services rendered by the Health Department, as it is found in many cases that persons on learning that a charge will be made, refrain from reporting the presence of rodents on their premises, thus acting as a deterrent to the effective treatment of an infested area, and likely to result in reinfestations.

In addition, much time is taken up in keeping accounts and endeavouring to recover monies in settlement of accounts.

I append below a resume of the work carried out during the year.

HOUSING STATISTICS.
The record of work done under the Housing Acts, etc., during the past
year is as follows:—
1. Inspection of dwelling houses during the year:—
(1) (a) Total number of dwelling houses inspected for housing
defects (under Public Health or Housing Acts) 148
Number of inspections made for the purpose 161
(2) (a) Number of dwelling houses (included under sub-head (1)
above) which were inspected and recorded under the Housing (Consolidated) Regulations, 1925, and Amend-
ment Regulations, 1932 Nii
(b) Number of inspections made for the purpose Nil
(3) Number of dwelling houses found to be in a state so danger-
ous or injurious to health as to be unfit for human habitation Nil
(4) Number of dwelling houses (exclusive of those referred to
under the preceding sub-head) found not to be in all respects
reasonably fit for human habitation 95
2. Remedy of defects during the year without service of Formal
Notices:—
Number of defective dwelling houses rendered fit in consequence
of informal action by the Local Authority or their officers 61
3. Action under Statutory Powers during the year:—
A. Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936:
(1) Number of dwelling houses in respect of which notices were
served requiring repairs 5
(2) Number of dwelling houses which were rendered fit after
service of formal notices:
(a) By Owners 8
(b) By Local Authority in default of Owners Nil

B. Proceedings under Public Health Acts:	
(1) Number of dwelling houses in respect of which notices were	
served requiring defects to be remedied	34
(2) Number of dwelling houses in which defects were remedied	
after service of formal notices:	
(a) By Owners	29
(b) By Local Authority in default of Owners	$Ni_{\tilde{l}}$
C. Proceedings under Sections 11 and 13 of the Housing Act, 1936:	
(1) Number of dwelling houses in respect of which Demolition	
Orders were made	Nil
(2) Number of dwelling houses demolished in pursuance of	
Demolition Orders	Nil

4. Housing Act, 1936. Part IV—Overcrowding.

There is still a number of cases of serious overcrowding in the district, and whilst every effort is made to relieve the most urgent cases, little can be done in a general way until more housing accommodation is available.

INFECTIOUS DISEASE.

DIPHTHERIA IMMUNISATION.

During the year the number of children immunised against Diphtheria was 91. Previous to 1944 there had been 1381 immunisations carried out, making a grand total of 1472.

The following tables set out the main particulars in relation to the notifiable infectious diseases for the year 1944.

NOTIFIABLE DISEASES DURING THE YEAR, 1944. (other than Tuberculosis.)

WATER SUPPLY.

The mains supply is from the Mid-Wessex Water Company, whose reports show the water to be satisfactory in quality and quantity. There are still sixty to seventy houses supplied from shallow wells, which is a circumstance to be deplored.

DRAINAGE AND SEWERAGE.

Out of a total number of 2,346 inhabited houses 147 have only cesspool drainage, and about 60 have only pail or earth closets. At least 90% of the houses are connected to the sewers.

SANITARY INSPECTION.

The following is the Sanitary Inspector's Report for the year ended 31st December, 1944.

Town Hall, Wokingham.

To Dr. W. B. Moore,

Medical Officer of Health.

The following premises used in connection with the preparation or sale of foods are licensed or registered in the Borough:—

SHOPS AND OFFICES.

Nine inspections were made under the provisions of the Shops Acts, 1934. Two contraventions were discovered and have since been remedied.

CAMPING SITES.

There are at present no sites in the Borough licensed as Camping Sites under Section 269 of the Public Health Act, 1936.

SMOKE ABATEMENT.

No action is called for in this District in regard to Smoke Abatement under the Act of 1926.

SWIMMING POOLS AND BATHS.

A description of the excellent (privately owned) Swimming Baths and Children's Pool was given in the corresponding paragraph in the Report for 1937, at page 95. The same amenities and facilities were available during the year under review.

SANITARY CONDITIONS REQUIRING NOTICE.

Conditions to which attention should be given when the war emergency is over, were included in the corresponding paragraph of the Report for 1940.

HOUSING.

Inspection of dwelling houses has been carried on as far as possible, and essential repairs insisted upon by informal action.

The number of houses at present owned by the Borough Council is 79.

Nu	mber of houses erected during the year 1941—	
	(a) Total (including numbers given separately under (b))	Nil

3.	Action under Statutory Powers during the year:— None	taken
4.	Housing Act, 1936. Part IV—Overcrowding:— No d	action

DISINFESTATION.

Disinfestation was carried out at 15 dwellings during the course of the year.

Materials used were "Cimex" blocks and "Zaldecide."

In all cases, repairs of an essential nature were carried out by the Owners of the properties and fumigation was carried out by Council employees before, during and after such repairs.

A letter from the M.O.H. was sent to all owners and occupiers of infested property drawing attention to their responsibilities and a marked improvement took place.

There were a considerable number of other properties which it was not found possible to treat during the year and although complaints of these pests ceased with the advent of the cold weather, it is anticipated that considerably more properties will be requiring attention during the forthcoming year.

MILK SUPPLY.

MEAT AND OTHER FOODS.

No licences were issued in respect of the five slaughterhouses in the Borough, general slaughtering being now carried out at Ministry of Food Regional establishments.

Periodic visits have been made to butchers' shops and all "cottagers' pigs" slaughtered under licence issued by the Ministry of Food have been inspected.

Fish stores are clean and well kept.

The 11 bakehouses in the Borough are all well kept and regularly lime-washed. It was not necessary to serve any formal notice with regard to food premises.

INFECTIOUS DISEASE.

DIPHTHERIA IMMUNISATION.

During the year 114 children were immunised against Diphtheria. Previously 1,474 children had received treatment making a grand total of 1,588.

The usual statistics relating to notifiable infectious diseases are set out in the tables below:—

NOTIFIABLE DISEASES DURING THE YEAR 1944. (other than Tuberculosis).

PUBLIC CLEANSING.

WET SCAVENGING.

Council's vehicles consist of two 1,000 and one 750-gallon Dennis vacuum machines, the latter being a dual purpose vehicle with interchanging refuse and cesspool emptying bodies.

Workmen employed are three drivers and two mates.

The contents are disposed of by broad irrigation at two disposal sites—one at Bray and the other at Cookham. A full-time workman is employed at Bray site and a part-time workman at Cookham.

The following Parishes are served by this Service: Bray, Bisham, Cookham and White Waltham.

By Resolution of the Council cesspools are not emptied more frequently than once a month.

Arising from the factors of sickness and excessive rainfall, the Cesspool Emptying Service was greatly in arrear during the months of November and December. To balance this, a vehicle was hired and a certain amount of relief was obtained in the position, but not a sufficient relief in accordance with Public Health requirements. Arising from this, I have to report that the existing service is insufficient, and as soon as circumstances permit should be increased to a minimum of four machines with the equivalent eight drivers and mates, for the serving on a normal basis of the existing Parishes which are cleansed.

DRY SCAVENGING.

This service has not been at all satisfactory. The amount of personnel available is fully 50% below the requirements for a fortnightly collection. It has also suffered from the fact that separate collections have to be made for the purpose of salvage.

The value of salvage collected and sold was £390 as against £1,141 for the previous year

SANITARY INSPECTION.

The following is the Report of the Sanitary Inspector (Mr. F. K. Knowles) for the year ended 31st December, 1944:—

"Oaklands,"
Bath Road,

Maidenhead.

(Tel. Maidenhead 252.)

To Dr. W. B. Moore,

Medical Officer of Health.

Dear Sir,

Inspections and Visits.

A total of 5,076 visits and inspections were carried out during the year and 77 complaints were received and investigated.

NOTICES AND LETTERS.

Informal	• • •	• • •	126	Prosecutions	• • •		Nil
Verbal	• • •		13	Letters received	• • •	• • •	4333
Statutory		• • •	Nil	Letters sent	• • •	• • •	2424
Notices complied	with	• • •	219	Persons interview	ed at O	$\dot{\mathrm{ffice}}$	581

INDEX OF WORKS.

To economise both with paper and detailed work, the index of works executed during the year has again been omitted.

Improvements completed, defects remedied and nuisances abated during the year total 219.

FACTORIES.

There are 43 Factories in the District. Forty-three visits were paid during the year, 2 informal notices were served and complied with.

SLAUGHTER HOUSES.

See sub-heading "Slaughter Houses" under paragraph on "Meat and Other Foods."

COWSHEDS AND DAIRIES.

Ninety-two visits were paid to these premises and many improvements were carried out, serving 4 informal notices.

DRAINAGE.

Several drainage systems to new buildings were inspected and approved during the year.

Several systems were reconstructed or additional drains were provided during the alterations or additions to existing buildings.

Drainage systems to 12 premises were relaid, repaired or provided after service of notice.

VERMINOUS PREMISES.

Four premises were found to be infested. In 2 cases disinfestation was carried out by this Council.

Housing (Rural Workers) Acts, 1926 and 1931.

Housing (Rural Workers) Amendment Act, 1938. No action was taken in connection with the above Acts.

SHOP INSPECTIONS.

During the year, 22 visits were made to shops where food is prepared or sold, and a number of improvements and alterations effected.

(Signed) F. K. KNOWLES,

Sanitary Inspector and Building Surveyor.

CAMPING SITES.

There are now 20 Camping Sites in the District which have been approved, subject to the conditions set out in the Report for 1939 at page 74.

SWIMMING BATHS AND POOLS.

Four pools in this District provide for public bathing and swimming; the situation of these were enumerated and described in the Report for 1938 (page 130).

SANITARY MATTERS REQUIRING NOTICE.

The question of providing suitable protective clothing for the workmen engaged in scavenging and the provision of better facilities for personal cleanliness at the Depot at Tittle Row are being considered, otherwise there is nothing to add to what appeared in this paragraph in the Report for 1940 in reference to matters in abeyance owing to war conditions.

HOUSING STATISTICS.

The record of work done under the Housing Acts, etc., during the past year is as follows:—

year is as follows.	
1. Inspection of dwelling houses during the year:—	
(1) (a) Total number of dwelling houses inspected for housing defects (under Public Health or Housing Acts)	1266
Number of inspections made for the purpose	1266
(2) (a) Number of dwelling houses (included under sub-head (1) above) which were inspected and recorded under the Housing (Consolidated) Regulations, 1925, and Amendment Regulations, 1932	Nil
(b) Number of inspections made for the purpose	Nil
(3) Number of dwelling houses found to be in a state so danger-	
ous or injurious to health as to be unfit for human habitation	1
(4) Number of dwelling houses (exclusive of those referred to	
under the preceding sub-head) found not to be in all respects	
reasonably fit for human habitation	126
2. Remedy of defects during the year without service of Formal Notices:—	
Number of defective dwelling houses rendered fit in consequence	•
of informal action by the Local Authority or their officers	126
3. Action under Statutory Powers during the year:—	
A: Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936	Nil
B. Proceedings under Public Health Acts	Nil
c. Proceedings under Sections 11 and 13 of the Housing Act, 1936	Nil
D. Proceedings under Section 12 of the Housing Act, 1936	Nil
4. Housing Act, 1936. Part IV—Overcrowding.	
(a) (i) Number of dwellings overcrowded at the end of the year	2
(ii) Number of families dwelling therein	$\frac{1}{4}$
(iii) Number of persons dwelling therein	21
(b) (i) Number of new cases of overcrowding reported within the year	Nil
(c) (ii) Number of cases of overcrowding relieved during the year	Nil
(iii) Number of persons concerned in such cases	Nil
(d) Particulars of any cases in which dwelling houses have again become overcrowded after the Local Authority	
have taken steps for the abatement of overcrowding	Nil

MEAT AND OTHER FOODS.

SLAUGHTER HOUSES.

By Government Order, all slaughter houses in the District have been closed down for the duration of hostilities.

The bulk of meat allocated to the District is sent from Mr. Dudley Sims' slaughter house, Maidenhead, whose premises have been taken over by the Ministry of Food for centralized slaughtering.

The Meat Inspectors of the Borough of Maidenhead and of the Cookham Rural District Council are working a night and week-end duty rota at the above slaughter house, so that every carcase may be inspected.

One hundred and seventy-nine visits were paid during the year to butchers' shops, and Central Slaughter House, Maidenhead.

Seven pigs were slaughtered and inspected at private houses and premises after the owners had procured a licence from the Food Control Office.

Unsound Food.

The undermentioned foodstuffs were condemned and surrendered, after being examined and found to be unfit for human consumption:—

MEAT.

103 lbs. 5 ozs. Pork.

OTHER FOODS.

869	tins Evaporated Milk.	4 tins Peas.
5	tins Condensed Milk.	1 tin Spinach.
2	tins Jam.	2 tins Chopped Ham.
11	tins Baked Beans.	1 tin Ox Tongue.
1	tin Fish Paste.	15 lbs. Tea.
2	tins Salmon.	180 lbs. Chocolate.
4	tins Pilchards	4 lbs. Cheese.
7	tins Plums.	691 lbs. Meat Roll.
5	tins Pineapple.	
1	tin braised Beef and Vegetables.	•

Bakehouses.

There are 9 premises in the District where baking of bread is carried on. Generally speaking they are well kept and in no instance was it found necessary to issue formal notices in respect of contraventions of the Acts.

OTHER FOOD SHOPS.

Inspections of all food premise	es unde	r Secti	on 13 a	and 14	. Food	and
Drugs Act, 1938, where food is pre-	epared,	stored	or sold	. were	as foll	ows:

INFECTIOUS DISEASE.

DIPHTHERIA IMMUNISATION.

During the year 165 children were immunised against Diphtheria. Previously 3,122 children had received treatment, making a grand total of 3,287.

The following tables give the chief statistics relating to the notifiable infectious diseases.

WATER SUPPLY.

Piped water is available to every Parish, and is supplied by the Mid-Wessex Water Company, Frimley Green, Aldershot (Parishes of Crowthorne, Sandhurst, Easthampstead, Binfield and Warfield) and by the South West Suburban Water Company, The Causeway, Staines (Parish of Winkfield). Routine monthly samples are taken of the Mid-Wessex Water Company supply and submitted for Bacteriological and Modified Chemical (Hardness) analyses to the Royal Institute of Public Health and Hygiene.

Routine quarterly samples of the South West Suburban Water Company supply are taken in conjunction with Windsor R.D.C., Egham U.D.C., Feltham U.D.C., Bagshot R.D.C. and Hayes and Harlington U.D.C. and submitted to the Clinical Research Association, Ltd., for Bacteriological and Chemical Analyses.

Source of Supply.	Total.		ONESS) Unsatis- factory.	,	Unsatis- factory.
Mid-Wessex Water Company	11	5	6	11	_
South West Sub- urban Water Company	19		19	18	1

Unsatisfactory (Hardness) means that the water was not softened to the required Statutory maximum of Twelve Degrees (Grains per Gallon).

Miscellaneous water samples are taken from sources of supply other than the Public Mains. Shortage of water and its unsavoury character were the reasons for sampling well supplies as follows:—

Swinley Cottage, Easthampstead ... Analyses good.

The Splash, West End, Warfield... ... Analyses unsatisfactory.

Eleven Cottages, Westley Hill, Binfield... Analyses unsatisfactory.

In the latter two cases, negotiations are proceeding to secure a piped supply to the cottages.

DRAINAGE AND SEWERAGE.

The sewerage installations for the Parishes of Binfield, Crowthorne, Sandhurst, Winkfield and the village of Bracknell, have been reviewed at length in previous Reports.

The Rainfall as recorded was:—

Crowthorne and Sandhurst Main Drainage ... — 16.68 ins. Bracknell — 21.19 ins.

Total flows treated:—

Crowthorne and Sandhurst Main Drainage — 107,000,000 gals.

Bracknell 67,524,000 gals.

Winkfield — 35,501,000 gals.

Binfield — Not measured.

Periodical samples of effluent from all works are taken by the Thames Conservancy Board's Inspector and these have satisfied the Board's standards of purity.

PUBLIC CLEANSING AND SALVAGE.

The weekly collection of house refuse and salvage has been maintained but labour and transport difficulties have caused temporary lapses in the service.

Householders and business premises have kept separate salvageable articles: paper, rags, bones, metals, jars, bottles and rubber. Their efforts have produced satisfactory results as follows:—

				Tons.	Cwts.		£	s.	d.
Paper	• • •	• • •	• • •	159	6	• • •	1,042	18	11
Textiles	• • •	* • •	• • •	16	2	• • •	250	1	11
Bones				5	2	• • •	24	3	6
Glassware		• • •	• • •	15	15	• • •	71	10	0
Metals	• • •	• • •	• • •	20	17	• • •	46	5	2
Miscellaneous		• • •		7	19	• • •	16	18	7

				225	1	• • •	£1,451	18	1

The urgency of efficient salvage work is as important as ever, particularly with regard to Bones, Paper and Textiles.

The piggery at Bracknell Works continues to be successfully maintained. There were 29 bacon pigs of a total weight of 314 score sent through the Ministry of Food Collecting Centre as a contribution to the Nation's bacon ration and realising £376 5s. 1d.

(1 disallowed; 1 settled without hearing; 1 still is	n

COUNCIL HOUSES.

abeyance).

The six cottages allotted to this Authority to be built for Agricultural Workers were completed and occupied during 1944.

FOOD INSPECTION.

There is no Government controlled slaughter-house in the District. Meat supplies under Ministry of Food rationing come through the Wholesale Meat Supplies Association, Reading. Home killed meat is killed and inspected at the Public Abattoir, Reading, and the Government controlled Slaughter House, Windsor. Emergency killing done in Easthampstead Rural District is inspected by the Sanitary Inspectors. Meat delivered to local butchers is inspected on request.

Considerable time is devoted to inspections at the request of the Ministry of Food and local shopkeepers, of tinned and dry goods, etc., either in Ministry of Food Buffer Depots or in shops. The following is a table of unsound food seized during the above inspections:—

Home killed meat	405 lbs.	Tinned Meats		62 tins.
Sausages	46 lbs.	Milk	,	
Beef and Veal Loaf	76 lbs.	Fish	• • •	
Ham and Brawn	351 lbs.	Beans		33 tins.
Dried Fruit	25 lbs.	Fruit	• • •	
Cheese	74 lbs.	Vegetables		22 tins.
Flour	140 lbs.	Soup		
Butter	7 lbs.	Peas		10 tins.
Potatoes	672 lbs.	Jam		11 tins.
Tea	25 lbs.	Horseradish		
Split Peas	19 lbs.	Shredded Wheat		•
Fish	441 lbs.	Eggs		-

COWSHEDS AND DAIRIES.

It has been found possible to carry out an increased amount of supervision over milk production in the District and although shortage of labour and materials render the carrying out of structural improvements difficult, some structural improvements have been put in hand on the premises of three milk producers. The number of producers and dairymen is shown below:—

(I) Producers (Farms)	• • •	• • •	74
(2) Retailers	• • •	• • •	35
(3) Accredited Producers (included in (1) above)		• • •	10
(4) Tuberculin Tested Producers (included in (1) above)	• • •	• • •	5
(5) Tuberculin Tested Bottling Licences		• • •	3
(6) Pasteurised Supplementary Licences	• • •	• • •	2
Number of inspections	• • •	• • •	15

RODENT CONTROL.

By direction of the Ministry of Food in conjunction with the Ministry of Health and Agriculture and Fisheries, Local Authorities were required to undertake a drive for the extermination of rats and mice from the "built-up" areas in their Districts. The same work for agricultural lands and premises being the duty of the War Agricultural Executive Committees.

Easthampstead Rural District and Windsor Rural District were made a "workable area" for this service and for that purpose appointed Mr. A. E. Day as Rodent Officer. Mr. Day allots his time by working two weeks in Easthampstead Rural District and one week in Windsor Rural District alternately. During the year Mr. Day has carried out his duties very tactfully and conscientiously with good results. The following is a summary of his work during the year for Easthampstead Rural District:—

Number of infested premises	• • •	• • •	116
", ", major infestations (50-100 rats)	• • •	• • •	9
Premises now considered free from infestations	• • •	• • •	63
Infestations transferred to B.W.A.E.C	• • •	• • •	4
Visits made for disinfestations	• • •	• • •	1,162
Premises re-inspected after disinfestation	• • •	• • •	106
Verified catches of rats		• • •	587
Estimated destroyed by gassing	• • •		682
", " " " poison baiting …	• • •		250

The methods used are poison baits, poison gas, trapping, ferrets and snares.

Causes of Deaths in Windsor Rural District, 1944.

INFECTIOUS DISEASE.

DIPHTHERIA IMMUNISATION.

During the year 111 children were immunised against Diphtheria. The number of children who had previously received treatment was 1,461, which makes a grand total of 1,572.

The following tables give the main statistical features of the cases occurring in this District during the year 1944.

TUBERCULOSIS.

It was not necessary to take any specific action under the Public Health (Prevention of Tuberculosis) Regulations, 1925 (compulsory discontinuance of employment) or under Section 62 of the Public Health

Act, 1925 (compulsory removal of patients to institutions). These powers are now included in Section 172 of the Public Health Act, 1936.

The following table gives the required particulars of new cases of Tuberculosis and deaths from all forms of that disease during 1944.

WATER SUPPLY.

A description of the Water Supply in this District was given at length in the Report for 1937 at page 194, which need not be repeated as the conditions remain unchanged, and further comments were added in the Report for 1938 at page 202. The chief source of supply is from the public mains of the South-West Suburban Water Company. By an arrangement with the six Districts in this neighbourhood on the same supply, samples from service pipes are taken periodically in rotation and the results of the analysis circulated.

Under the combined sampling arrangements, operating between neighbouring Authorities, 25 Analyst's Reports were received during 1944, on samples of water taken from the public supply. In no case was the water judged to be unfit for drinking purposes. Four of the samples were taken in the Windsor Rural District.

In addition, the water from five wells in the Parish of Old Windsor was sampled, with a view to the possible use of these supplies for emergency purposes. Enquiries made during the previous year revealed the existence of "supplementary water supplies," i.e., wells, springs, lakes, etc., at 110 premises in the District.

DRAINAGE AND SEWERAGE.

The drainage and sewerage of this District has been fully described in previous Reports under this heading and need not be repeated. Mr. E. J. Toy is the Works Manager and Sanitary Superintendent for Sunninghill and Sunningdale, whose address and telephone number are "Mascal," Ascot; Ascot 357.

PUBLIC CLEANSING.

As mentioned in previous Reports, Wet Scavenging, i.e., emptying of cesspools, is still carried out in the Parishes of Sunninghill and Sunningdale at the few houses which have not yet been connected to the public sewer, most of these being so situated that connection is impossible. The Parish of Old Windsor is not sewered.

Dry Scavenging, i.e., removal of house refuse, is carried out in all three parishes and combined with it there is a well organised Salvaging Scheme for the recovery of useable waste materials.

SANITARY INSPECTION.

The Report of Mr. W. H. Rowsell, Sanitary Inspector for this District, for the year ended 31st December, 1944, is reproduced below.

Council Offices,

Bowden Road, Sunninghill.

(Tel. Ascot 893.)

To Dr. W. B. Moore,

Medical Officer of Health.

Dear Sir,

Under various headings, I submit below a brief account of the Public Health Work carried out in this District during the year 1944. It will, I feel, be realised that the record is by no means exhaustive owing to the continued disturbance of peace time curriculum and methods.

Local experience does not suggest that any real fillip has been given to Housing (repairs and reconditioning) so far as Housing of the Working Classes is concerned, by Ministry of Health Circular 2871. Under this Circular, Essentiality Certificates were issued in 14 cases and application refused in one case only of the 14 issued, 2 only applied to premises occupied by persons of the Working Class. Two partly finished houses, certified in 1943, are now nearing completion and will constitute a small but very acceptable contribution to the District's "Housing Problems." Further "Housing" details are given under a separate paragraph.

Milk has continued to receive the Councils earnest attention, and the more detailed reference made elsewhere, is indicative of an attempt to check up on the purity of supplies.

The employment of a part-time Rodent Operative has been fully justified by the demand for disinfestation services. Fortunately, no major infestations exist in the area, but the so-called "minor" type provide adequate scope for baiting, gassing and trapping, and these methods are efficiently used.

One hundred and forty cases of Infectious Diseases were notified during the year. This figure includes all types and all cases occurring amongst Military and Institutional personnel. Disinfection of rooms and contents is carried out where necessary.

The Water Supply of the District has been kept at a satisfactory level of purity, and analysts' Reports are submitted to the Council monthly.

A summarised list of inspections is appended hereto, but work specifically connected with the National Emergency, e.g., War Damage Repairs, Requisitioned Properties, etc., is not referred to in this Report.

Notices.

Eighty-two Informal Notices were given during the year (including verbal); the majority were complied with by the year's end, but owing to emergency work a complete check has not been possible.

(Signed) W. H. ROWSELL, Sanitary Inspector.

BUILDING SURVEYOR'S REPORT, 1944.

The following is a summary of Building activities, etc., during the year ended 31st December, 1944:—

Plans deposited during 1944.	A_I	prove	Rejected.			
New buildings	• • •	• • •	• • •	5	• • •	3
Alterations and additions	• • •	• • •	• • •	7	• • •	2
Change of user	• • •	• • •	• • •	1	• • •	1
Drainage			• • •	6	• • •	1
Lay-out	• • •	• • •	• • •	1	• • •	1
Inspections made	• • •	• • •	• • •	49	• • •	0

In view of the Government's sustained appeal for restricted use of materials and labour for property maintenance purposes, the Council has discontinued, for the war period, the general maintenance policy as to Council houses, referred to in the Report for 1939, page 127.

At Council houses, 60 inspections were made for the purpose of effecting repairs and decorations where necessary.

A proposal to substitute a brick wall for the very dilapidated fencing surrounding 20 of the Council's houses at Ascot, was abandoned in 1943, approval to expenditure being refused. A similar proposal affecting houses at Sunningdale failed this year for the same reason. Meanwhile the boundary fencing at these estates presents a lamentable picture, and the solution is not easy to find. Post-war Housing Schemes are being formulated for South Ascot and Sunningdale, and the Council have conferred with representatives from Women's Institutes on matters affecting general planning.

Matters relating to War Emergency work are excluded from this Report.

(Signed) W. H. ROWSELL,

Building Inspector.

SHOPS AND OFFICES.

In all, 22 visits were paid to shop premises, excluding food shops, during 1944. Cleanliness was fairly well maintained and it may be said that no shops in this District, employing staff, are now without means for maintaining a reasonable temperature and healthy atmosphere, and in all cases sanitary conveniences are available.

Fuel Control naturally added to the difficulties associated with temperature control, and at times the best had to be made of a bad job in this particular respect.

CAMPING SITES.

There is one Licensed Camping Site in the District at Ascot. Other unlicensed sites are used from time to time, but in view of the acute shortage of dwellings no statutory action is taken provided a nuisance is not created.

It may perhaps be appropriately mentioned here that under an agreement entered into in 1942 between the Windsor Borough Council (as land owners) and the Windsor Rural District Council (as the Local Authority), under the Town and Country Planning Act, 1932, the use of certain bungalows on Ham Island as permanent dwellings is limited to the summer months only, unless specifically licensed for continuous use during the months October to April (inclusive). Sixteen licences, as above, are at present in force.

SMOKE ABATEMENT.

SWIMMING BATHS AND POOLS.

SANITARY CONDITIONS REQUIRING NOTICE.

The above subjects were commented upon in the Report for 1939, pages 128-129.

The provision of scavenging and other public services for that outlying portion of the District situated on Friary Island is still an unsolved problem as the Island can be approached only by a long detour—some $4\frac{1}{2}$ miles—through the neighbouring Rural District of Eton (Bucks). Negotiations have been in progress for some time with the Bucks Local Authorities to take over the work, but so far no definite conclusion has been reached.

During the year under review, however, a partial solution has been found by way of an arrangement with an adjacent Local Authority whereby they undertake the Scavenging at some three or four premises which can be reached via a foot bridge at the southern end of the Island. At the same time, attempts have been made to persuade the Developer to provide suitable and safe means of access to the Island for the Council's The long-standing question vehicles, but these have met with no success. of sewering the Parish of Old Windsor has engaged the special attention of the Council during 1944, and Consulting Engineers are now engaged on the preparation of a scheme.

HOUSING.

The following is a statement of the Sanitary Inspector under	the
Housing and Public Health Acts during the past year:—	
1. Inspection of dwelling houses during the year:—	
(1) (a) Total number of dwelling houses inspected for housing	
defects (under Public Health or Housing Acts)	53
(b) Number of inspections made for the purpose	135
(2) (a) Number of dwelling houses (included under sub-head (1)	
above) which were inspected and recorded under the	
Housing (Consolidated) Regulations, 1925, and Amend-	
ment Regulations, 1932	15
(b) Number of inspections made for the purpose	41
(3) Number of dwelling houses found to be in a state so danger-	
ous or injurious to health as to be unfit for human habitation	Nil
(4) Number of dwelling houses (exclusive of those referred to	
under the preceding sub-head) found not to be in all respects	
reasonably fit for human habitation	53
2. Remedy of defects during the year without service of Formal	
Notices:—	
Number of defective dwelling houses rendered fit in consequence	
of informal action by the Local Authority or their officers	47
3. Action under Statutory Powers during the year:— .	
A. Proceedings under Sections 9, 10 and 16 of the Housing Act,	•
1936 :	
(1) Number of dwelling houses in respect of which notices were	
served requiring repairs	Nil

(2) Number of dwelling houses which were rendered fit after	
service of formal notices:	
(a) By Owners	Nil
(b) By Local Authority in default of Owners	Nil
B. Proceedings under Public Health Acts	Nil
c. Proceedings under Section 11 and 13 of the Housing Act, 1936:	
(1) Number of dwelling houses in respect of which Demolition	
Orders were made	Nil
(2) Number of dwelling houses demolished in pursuance of Demolition Orders	Nil
4. Housing Act, 1936. Part IV—Overcrowding.	
(1) Number of cases of overcrowding relieved during the year	Nil
(2) Number of persons concerned in such cases	Nil
One agricultural cottage, the subject of a certificate (under Order	r in
Council dated July 2nd, 1940) allowing its use as a dwelling, as a	war-
time measure, was repaired during the year by the owners, following	ıg a

MEAT AND OTHER FOODS.

temporary withholding of the certificate.

During the year under review, meat for this District has been supplied from animals slaughtered at the Government Slaughter House at Windsor, which means that none of the five slaughter houses in the District have been in use, apart from occasional killing by cottagers and others, under the Ministry of Food self-supply Meat Scheme.

The following articles have been examined and voluntarily surrendered and disposed of as being unfit for human food, in all possible cases the foods are used for animal feeding stuffs:—

DIPHTHERIA IMMUNISATION.

During the year 299 children were immunised against Diphtheria. The number of children who had previously received treatment was 3,979, making a grand total of 4,278.

The following tables summarise the position in regard to notifiable infectious diseases during the year:—

NOTIFIABLE DISEASES DURING THE YEAR, 1944.

TUBERCULOSIS.

[It was not necessary to take any specific action under the Public Health (Prevention of Tuberculosis) Regulations, 1925 (compulsory discontinuance of employment), or under Section 62 of the Public Health Act, 1925 (compulsory removal of patient to institution), now included in Section 172 of the Public Health Act, 1936.

Particulars of new cases of tuberculosis and of all deaths from this disease whether the cases have been notified or not during the current year are set out in the table below.

WATER SUPPLY.

The water supply has been generally satisfactory except in one or two areas, chiefly in the supply area of the Mid-Wessex Company. During the summer a number of wells ran dry and overground pipes were laid to stand-pipes to supply certain premises in the Parishes of Finchampstead and Wokingham Without. The Broadcommon area of Hurst and the Farley Hill area of Swallowfield had also to be supplied with water by means of static tanks, which, together with static tanks fixed at the Council Houses in Trowes Lane and Riseley Banks, will probably have to remain until main water is available.

The quantity of water available is ample for the needs of the District, but the storage capacity of the reservoirs is entirely inadequate, and a breakdown of the pumping plant for more than three or four hours during the period of maximum demand would result in large parts of the District being entirely without water supplies.

Main water is laid on to about 7,000 houses out of a total of 8,800, or 80% of the total. The remaining 20% are supplied by wells, mainly shallow.

The following bacteriological examinations of water were made during the year:—

(1)	Raw piped water	• • •	• • •	• • •	•••	• • •	. 9
(2)	Treated piped water	• • •	• • •		•••	• • •	14
(3)	Raw well water	• • •	• • •	• • •	• • •	• • •	25

The results of these examinations were as follows:—

- (1) 7 satisfactory; 2 unfit.
- (2) 14 satisfactory.
- (3) 9 satisfactory; 7 passable; 9 unfit.

The necessary action was taken on the "unfit" samples.

During the year 76 new services were laid.

DRAINAGE AND SEWERAGE.

About 86% of the houses in the area are not connected to the sewers.

During the year the Engineer's Department has had to cope with almost insuperable difficulties with regard to cesspool emptying, owing to shortage of labour. Cesspools have been overflowing literally in hundreds. The Ministry of Labour and National Service and the Ministry of Health have been appealed to, but they have not been able to help.

DRY SCAVENGING.

The collection of salvage and refuse has been maintained during the year on a fortnightly basis throughout the whole of the District. This has only been accomplished by the depleted staff working a great deal of over-time, as labour and transport shortage have been very acute..

The disposal of the salvage which is dealt with at one central depot, has been very satisfactory. Mr. Evans, Salvage Officer, reports that the amounts and value of the salvage disposed of are as follows:—

SANITARY INSPECTION.

Following is the Report of the Senior Sanitary Inspector for the year 1944.

Council Offices,
Shute End,
Wokingham, Berks.
March, 1945.

Dr. W. B. Moore,

Medical Officer of Health,

"The Wilderness," Maidenhead, Berks.

Dear Sir,

I have the honour of presenting herewith my Report of work carried out during the year ended 31st December, 1944.

The total number of visits made during the year was 4,084, apportioned as below:

Number	of	compl	lair	nts receiv	red	• • •	• • •	• • •		• • •	276

(Signed) W. L. LONGHURST,

Senior Sanitary Inspector.

HOUSING.

The following particulars have been supplied by Mr. Stanley E. Hayward, who is in charge of the Building Surveyor's Department, through the absence of Mr. Tween, Building Surveyor, on Military Service.

Plans for 67 buildings of various categories were submitted for the Council's consideration; 9 of these were disapproved under the Building Byelaws. The new dwellings erected were for essential workers and licenses were granted by the Regional Planning Officer.

Number of plans deposited:

For new buildings				• • •	• • •	20
For alterations and additions to exi	sting	building	S			45
Number of new buildings erected	• • •		• • •		• • •	Nil
For proposed Estate Development		• • •		• • •	,•••	2

The number of dwelling houses erected and owned by the District Council remains at 410.

HOUSING (RURAL WORKERS) ACT, 1926.

Two applications were received during the year under the above Act, and the maximum grant of £100 was allowed in each case.

REQUISITIONED HOUSES.

One hundred and forty-eight houses have been requisitioned since 1940 for housing essential workers, evacuated families and families found to be living under insanitary conditions; 9 of these, being no longer required, have been released, leaving 55 still occupied for the reasons stated.

HOUSING STATISTICS.

The record of work done under the Housing Acts, etc., during the past year is as follows:—

year is as follows:—	T
1. Inspection of dwelling houses during the year:—	
 (1) (a) Total number of dwelling houses inspected for housing defects (under Public Health or Housing Acts) (b) Number of inspections made for the purpose 	247 494
(2) (a) Number of dwelling houses (included under sub-head (1)	494
above) which were inspected and recorded under the Housing (Consolidated) Regulations, 1925, and Amend-	
ment Regulations, 1932	6
(b) Number of inspections made for the purpose (3) Number of dwelling houses found to be in a state so danger-	13
ous or injurious to health as to be unfit for human habitation (4) Number of dwelling houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects	4
reasonably fit for human habitation 2. Remedy of defects during the year without service of Formal	64
Number of defective dwelling houses rendered fit in consequence of informal action by the Local Authority or their officers	70
3. Action under Statutory Powers during the year:— A. Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936:	
(1) Number of dwelling houses in respect of which notices were served requiring repairs	2

	(2) Number of dwelling houses which were rendered fit after service of formal notices:
1	(a) By Owners
1	(b) By Local Authority in default of Owners
	B. Proceedings under Public Health Acts:
	(1) Number of dwelling houses in respect of which notices were
3	served requiring defects to be remedied:
	(2) Number of dwelling houses in which defects were remedied
	after service of formal notices:
3	(a) By Owners
Nil	(b) By Local Authority in default of Owners
	c. Proceedings under Sections 11 and 13 of the Housing Act, 1936:
	(1) Number of dwelling houses in respect of which Demolition
2	Orders were made
da da	(2) Number of dwelling houses demolished in pursuance of
Nil	Demolition Orders
Nil	D. [Proceedings under Section 12 of the Housing Act, 1936
	4. Housing Act, 1936. Part IV—Overcrowding.
	(a) (i) Number of dwellings overcrowded at the end of the
. 10	year
15	(ii) Number of families dwelling therein
$75\frac{1}{2}$	(iii) Number of persons dwelling therein
4	(b) Number of new cases of overcrowding reported during
4	the year
	(c) (i) Number of cases of overcrowding relieved during the
5	year
$39\frac{1}{2}$	(ii) Number of persons concerned in such cases
	(d) Particulars of any cases in which dwelling houses have
	again become overcrowded after the Local Authority
Nil	have taken steps for the abatement of overcrowding
	(e) Any other particulars with respect to overcrowding
	conditions upon which the Medical Officer of Health
Nil	may consider it desirable to report

INSPECTION OF FOOD.

See Sanitary Inspector's Report for summary.
